

Case Studies

AA Recycling Limited

This truly unique recycling company was thriving, however their insurer was about to refuse them insurance, because they hadn't addressed some of the basic health and safety issues required of them by law. We explained to them in a clear and simple way what needed to be done, and why. Without question, from this point forward not only did they improve, within 12 months we had resolved all of their insurer's reservations and we had saved them £45,000 on their premiums.

MCT Remanufacturing

The works director was a very busy man with 150 staff and a £24 million turnover, every day went by quickly, but risk assessments weren't being done, issues weren't being resolved and staff were feeling left out. By offering him a monthly health and safety support package we were able to *pinpoint* key aspects that needed to be dealt with, and we helped him reduce his workload. We gave the management team a lift and time to focus on productivity and with us providing staff with health and safety support, risk assessments, we highlighted and explained to him and his team what needed to be done and how, saving them both time and money and reassured staff.

Fountain Timber Products

With four core businesses the M.D. was becoming over whelmed with health and safety, ISO accreditation and dealing with the day-to-day health and safety issues. With our support package the company has thrived, it has retained its ISO accreditation, gained FSC certification, improved staff relations and reduced its sickness/absence record and reduced its insurance premiums. Today the M.D. enjoys meeting with our staff, discussing environmental matters and is over joyed when speaking with his insurers because he can give them prompt and positive feed back, about occupational health matters, staff training and the safety management system.
